Your next startup risk?
An untested assumption.

Meet VentureStress AI

From a business idea to a testable plan.

A hackathon proof of concept for entrepreneurs.

Know who you are building for.

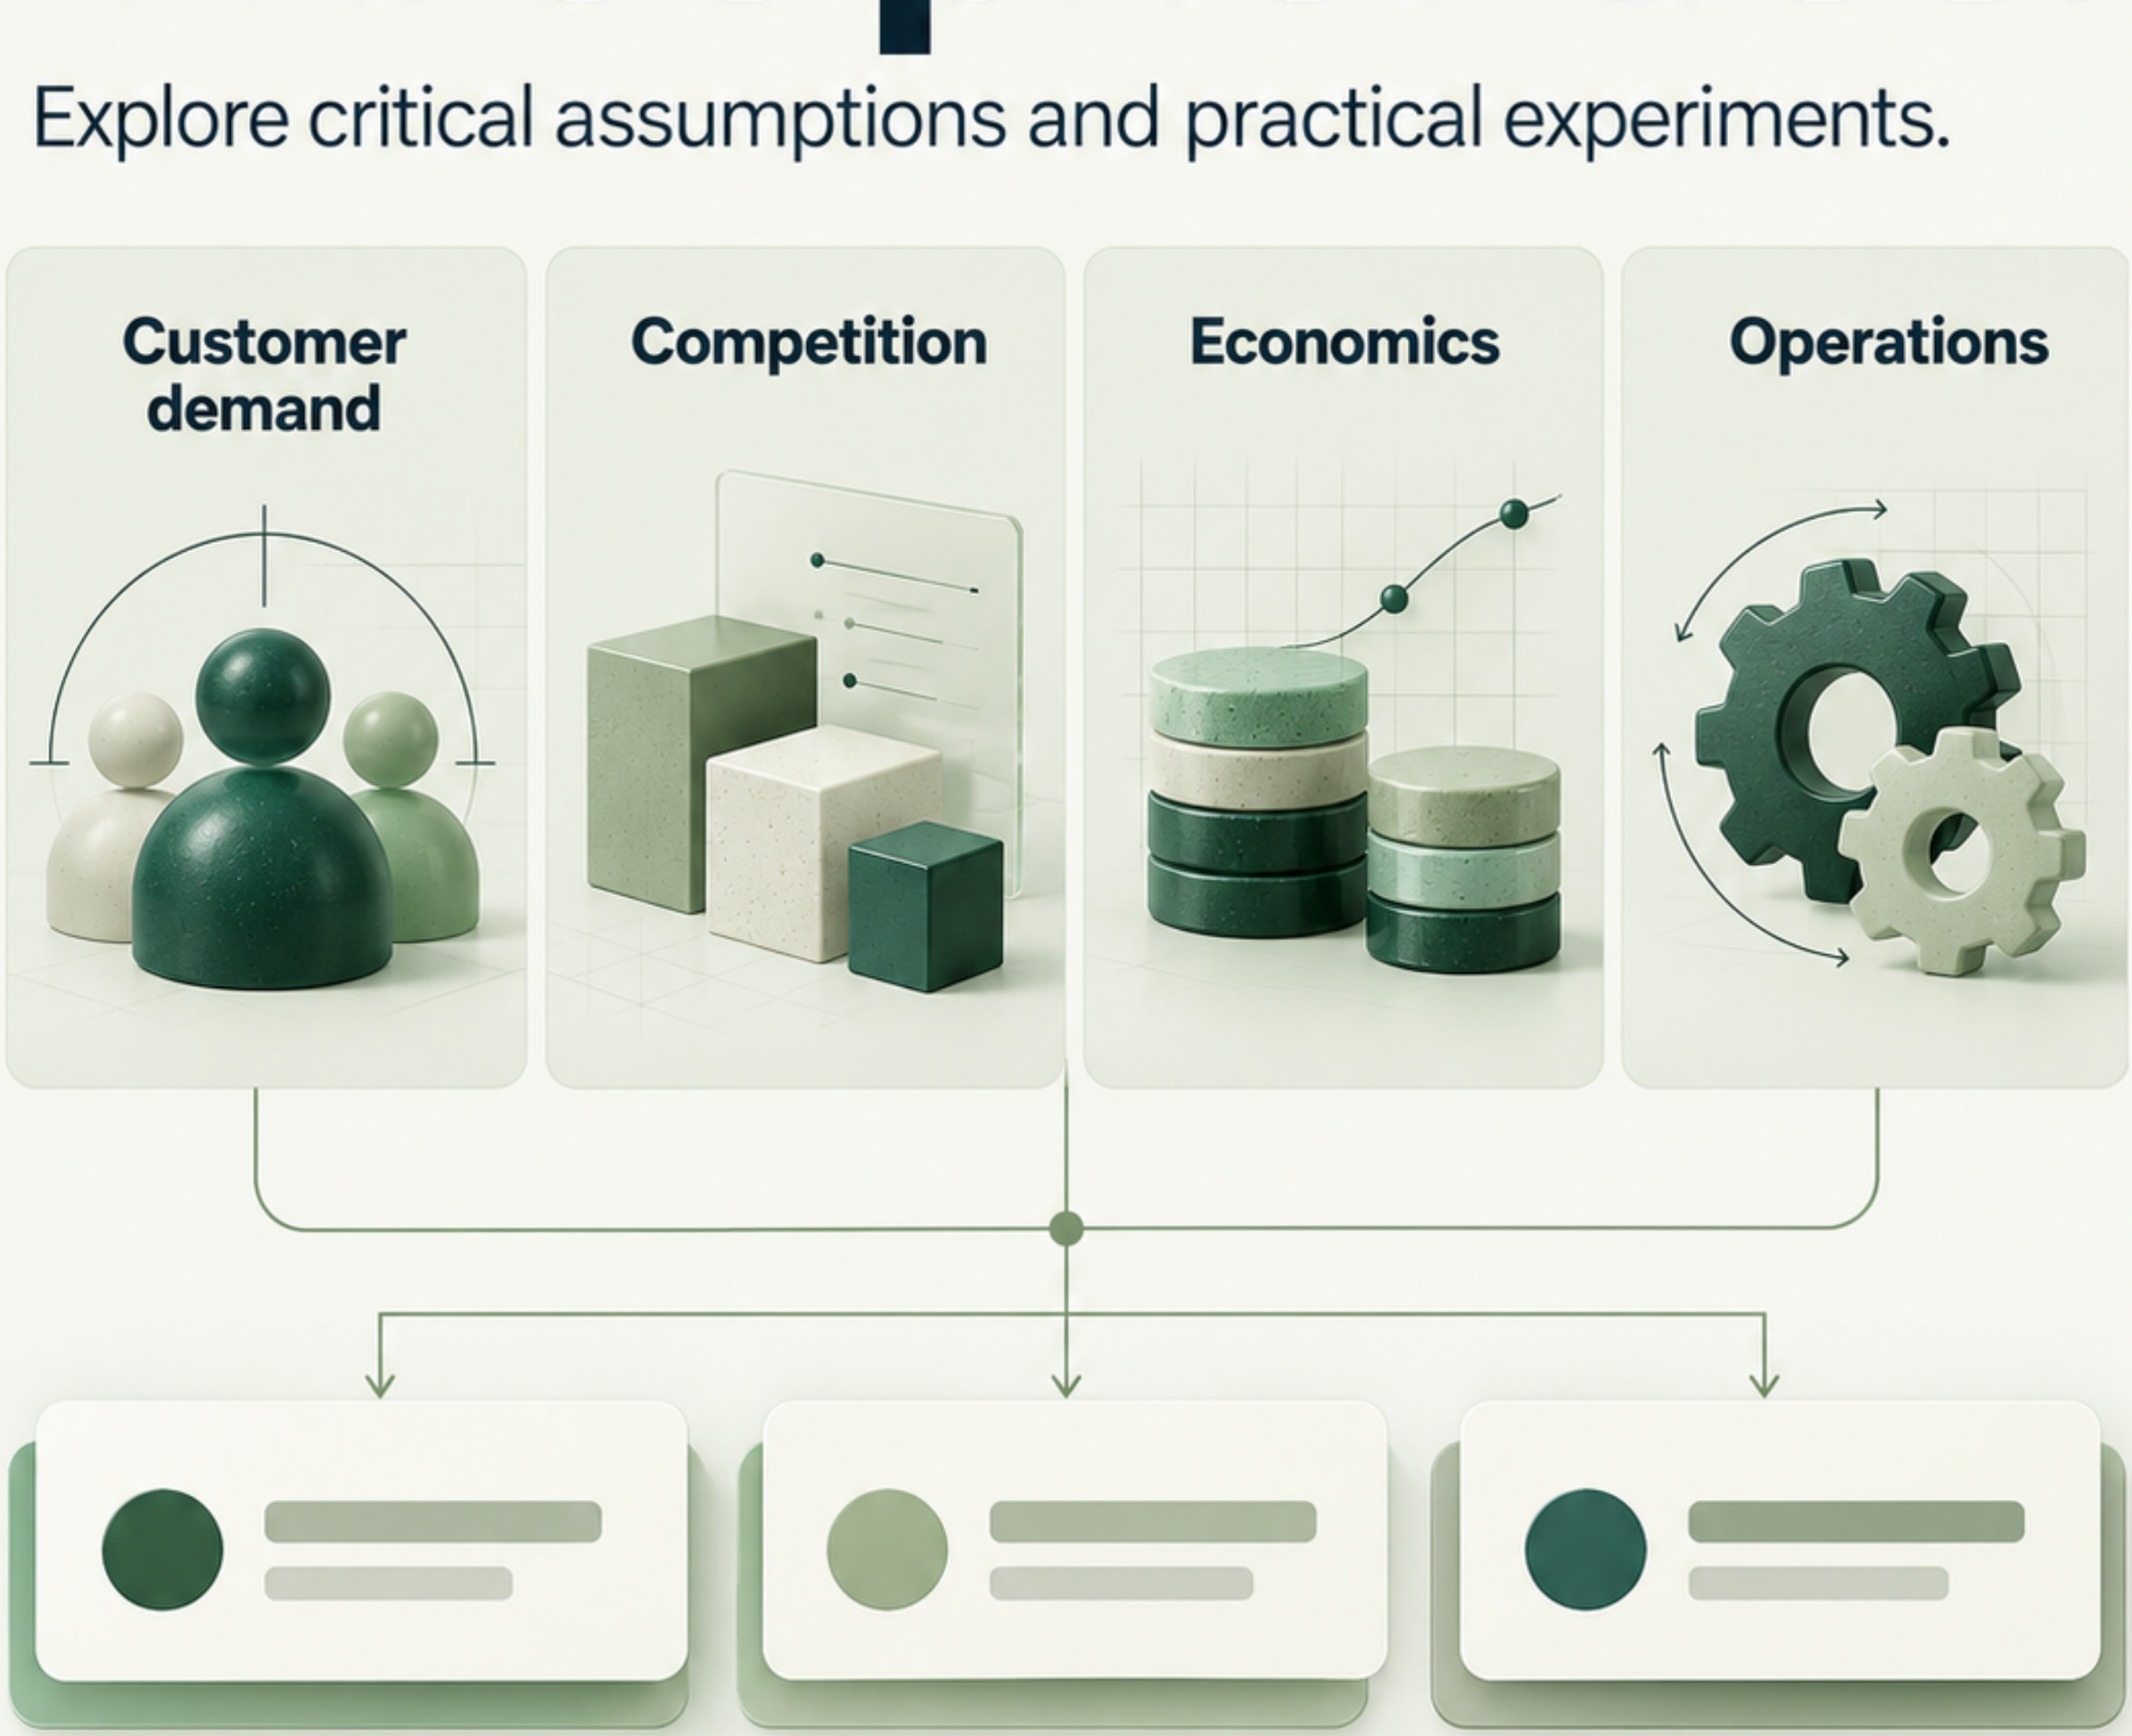

Confirm your target market before analysis.

AI suggestions are hypotheses you can edit.

Four lenses. Three priorities.

Explore critical assumptions and practical experiments.

Priorities use qualitative impact and uncertainty.

Research competitors. Follow the sources.

Tavily finds pages. Gemini explains relevance.

Local availability is marked when unverified.

What would you test before you build?

Try your idea. Challenge an assumption.
